Transact

The Transactional Multifunctional Kiosk

The Transact model was developed for indoors use to work as stand up kiosk.

This model can be manufactured in stainless steel or painted steel (available in all RAL colors) using steel plate of 1,5mm to 2,5mm which ensures the stability and rigidity of the all structure.

This kiosk was designed having in mind the components that can integrate. The transact is the chameleon of the kiosks because it can easily adapt the needs of each client.

The Transact model is the kiosk that can integrate more components that the Group Partteam has. It is ideal for airports (boarding despenser cards and stickers for luggage) and large companies that need a machine that automatically does a large number of functions.

The area where computer is installed and possible peripherals (card readers, coin acceptors, etc.), is protected with access through a security lock and includes a base with three power plugs.

One of the main characteristics of these kiosks is its design that allows integrating a large number of peripheral devices (card readers, tickets printer, coin acceptors, etc.) without having to redisgn large pieces which gives this model great versatility and increases the applications field.

The Transact Model can be equipped with a Atom CPU with a 160 GB hard drive, 1 Gb Ram Memory, a 128Mb graphic card and a 10/100 mb ethernet, and Windows 7 Starter.

Technical Specifications
Transact Kiosk

Dimensions: H1650 x W700 x D350
Weight: aprox. 180 Kg.
